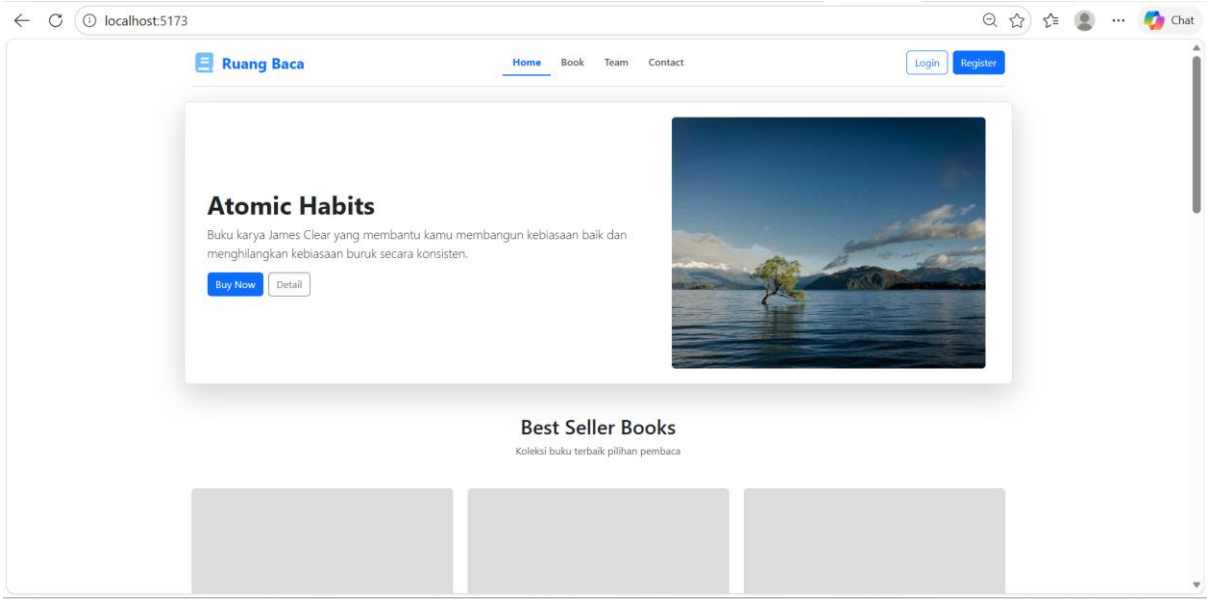
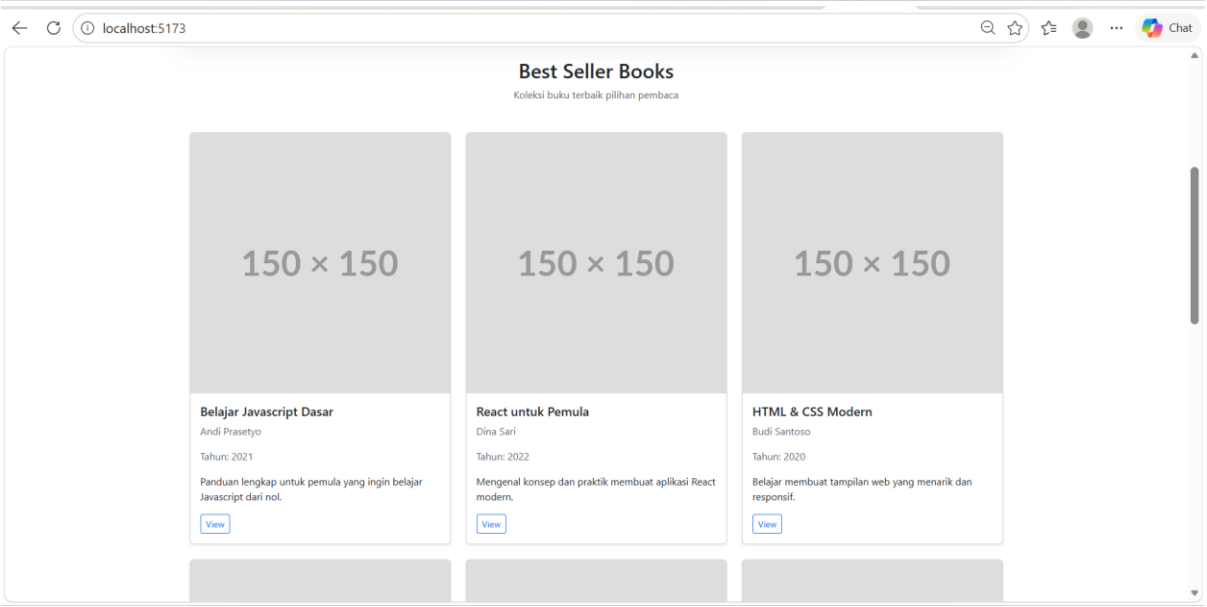
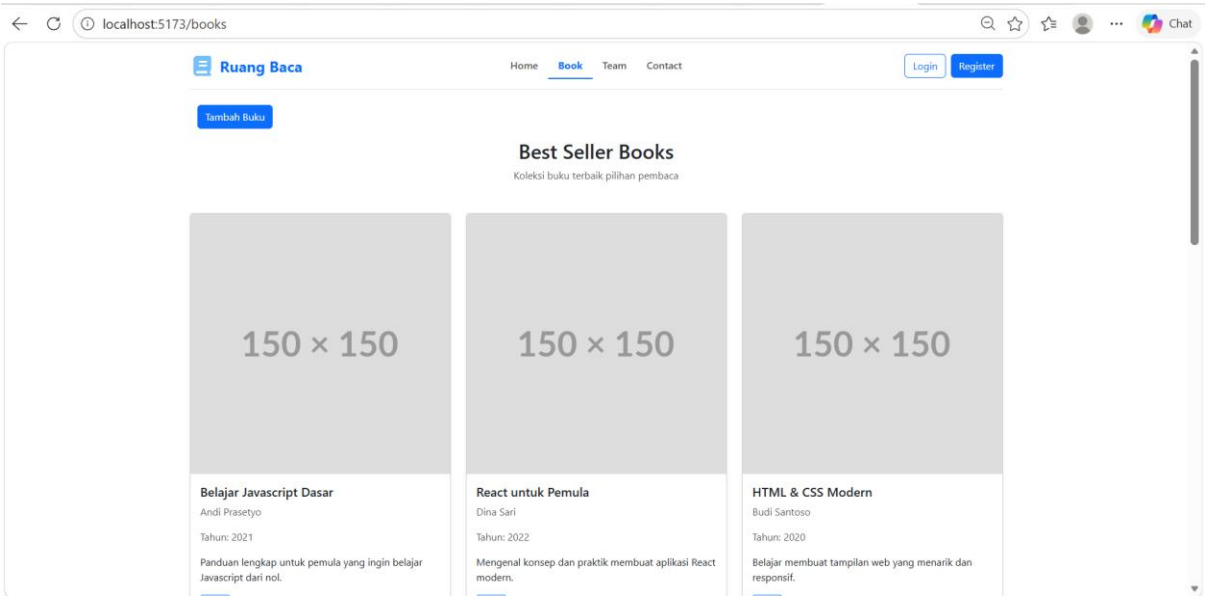
Tugas 3 React JS

- Link github
  https://github.com/jihanlthfh/Tugas3-React.JS-Jihan-Lathifah-Imtinan-Universitas-Bhayangkara-Jakarta-Raya.git
- Tampilan
  Menampilkan data 9 buku di halaman home dan halaman Book, seperti arahan tugas

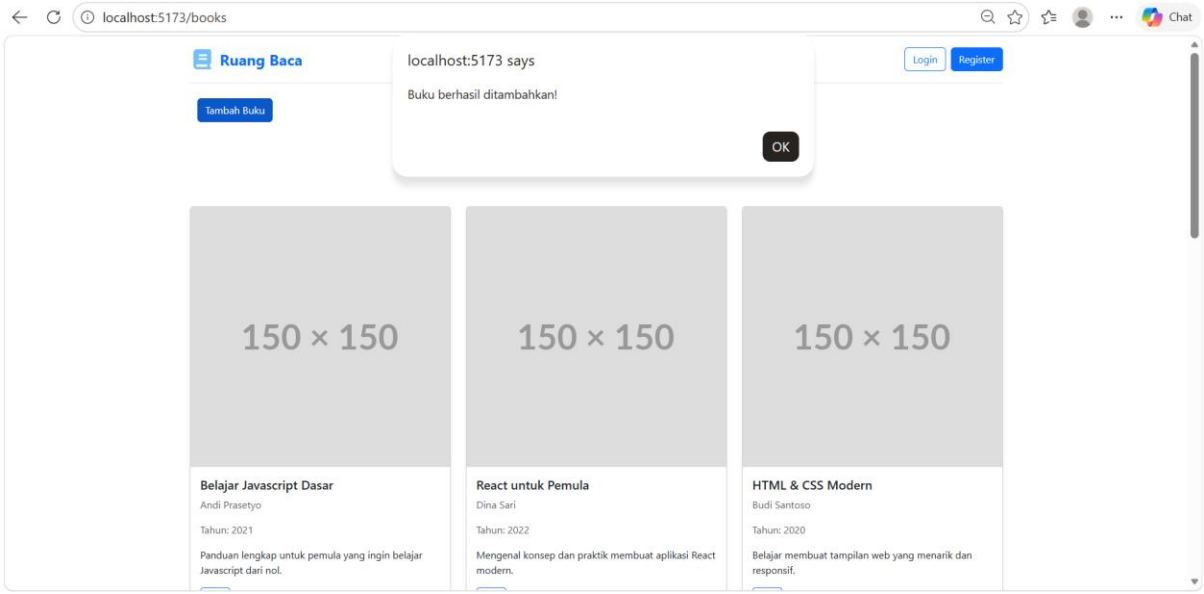




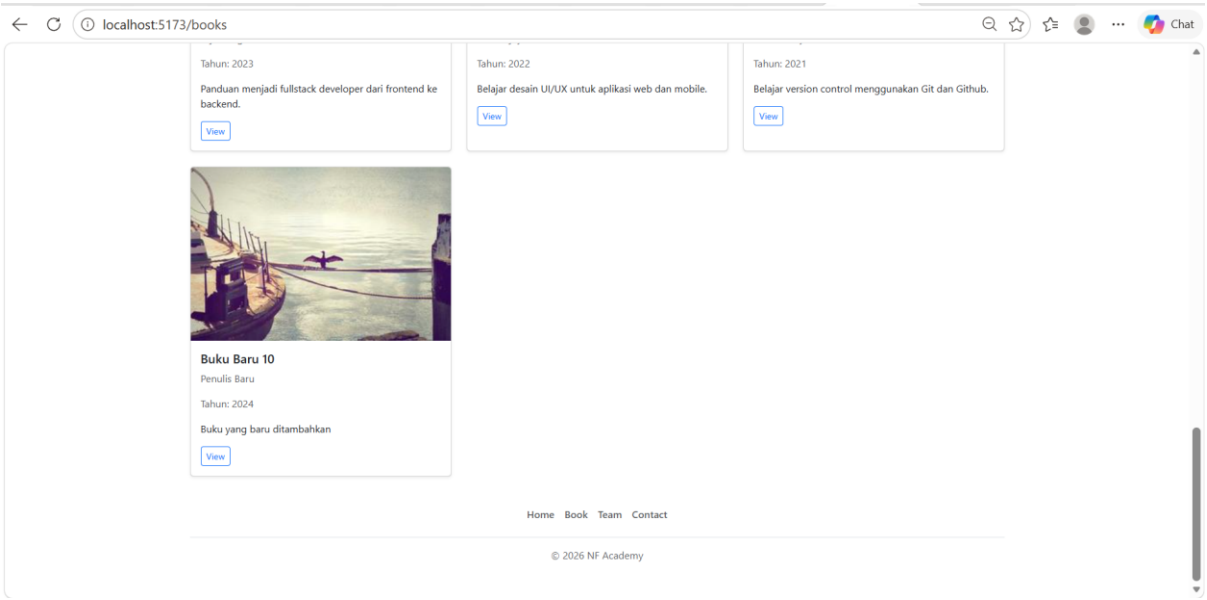
Ini di bagian halaman book



Jika klik Tambah buku akan muncul notifikasi "Buku berhasil ditambahkan!"



Buku yang di tambahkan dibuat berbeda sendiri cover nya, saya sengaja agar membedakan. Buku yang di tampilkan lainnya menggunakan web https://placehold.co/150 seperti contoh video. Sisa nya tidak ada yang saya ubah



- Code yang di ganti itu ada beberapa yaitu di halaman:
  - App.jsx

```
import { BrowserRouter, Routes, Route } from "react-router-dom";
import './App.css'

import Books from './components/Pages/auth/books'
import Home from './components/Pages'
import Login from './components/Pages/auth/login'
import Register from './components/Pages/auth/register'
import Team from "./components/shared/Team";
import Contact from "./components/shared/Contact";

function App() {
  return (
    <BrowserRouter>
      <div className="container">
        <Routes>
          <Route path="/" element={<Home />} />
          <Route path="/books" element={<Books />} />
          <Route path="/login" element={<Login />} />
          <Route path="/register" element={<Register />} />
          <Route path="/team" element={<Team />} />
          <Route path="/contact" element={<Contact />} />
        </Routes>
      </div>
    </BrowserRouter>
```

```
    )
  }

  export default App;
```

- ProductList file nya index.jsx

```
  export default function ProductList({ data = [] }) {
    return (
      <>
        <section id="books" className="text-center mb-5">
          <h2>Best Seller Books</h2>
          <p className="text-muted">
            Koleksi buku terbaik pilihan pembaca
          </p>
        </section>

        <div className="row g-4">
          {data.map((book, i) => (
            <div className="col-md-4" key={book.id || i}>
              <div className="card shadow-sm h-100">
                <img
                  src={book.image ||
  `https://picsum.photos/300/200?random=${i}`}
                  className="card-img-top"
                  alt={book.title}
                />
                <div className="card-body">
                  <h5>{book.title}</h5>
                  <p className="text-muted">{book.author}</p>
                  <p className="text-muted">Tahun: {book.year}</p>
                  <p>{book.description}</p>

                  <button className="btn btn-sm btn-outline-
  primary">
                    View
                  </button>
                </div>
              </div>
            </div>
          ))}
        </div>
      </>
    );
  }
```

- Books file nya index.jsx

```
import { useState } from "react";
import booksData from "../../../../Utils/books";
import Footer from "../../../shared/Footer";
import Header from "../../../shared/Header";
import ProductList from "../../../shared/ProductList";

export default function Books() {
  const [books, setBooks] = useState(booksData || []);

  const tambahBuku = () => {
    const bukuBaru = {
      id: books.length + 1,
      title: `Buku Baru ${books.length + 1}`,
      author: "Penulis Baru",
      year: 2024,
      description: "Buku yang baru ditambahkan",
      image: `https://picsum.photos/300/200?random=${books.length
+ 1}`
    };

    setBooks((prevBooks) => [...prevBooks, bukuBaru]);

    alert("Buku berhasil ditambahkan!");
  };

  return (
    <>
      <Header />

      <div className="container mt-4">
        <button onClick={tambahBuku} className="btn btn-primary
mb-3">
          Tambah Buku
        </button>
      </div>

      <ProductList data={books} />

      <Footer />
    </>
  );
}
```

- Folder Utils yang ada di arahan tugas dengan file books.js

```
const books = [
  {
```
